PAIPPALĀDASAMHITĀ 4.14. REMOVING AN ARROW-TIP FROM THE BODY

Arlo Griffiths École française d'Extrême-Orient Alexander Lubotsky Leiden University

Abstract

This article presents the critical edition with annotated translation of a hymn of the Paippalādasaṃhitā, an important early Sanskrit text consisting of poetic formulae (mantras) that were to be used by priests to accompany ritual acts of diverse types. The Paippalādasaṃhitā being the last important text of the Vedic corpus not yet to have been edited and translated in its entirety, and being transmitted in unusually divergent manuscript traditions, its critical philological study offers many examples to illustrate the problems of Indian textual criticism. The hymn selected here, to that purpose, concerns the removal of an extraneous body (śalya-) that has penetrated a human patient's body.

The hymn we present here comprises material not known in any other Vedic text. It affords new insights into the life of the Vedic Indians, new lexical items, archaic verb forms next to grammatical and lexical innovations and new problems of various kinds, especially those of the manuscript transmission of the text and its (chronological) relation to other Vedic texts.

In our commentary below, we will repeatedly point out typical features of the manuscript transmission of this work, which it is vital to pay attention to in textual criticism of individual readings. At a different level

¹ The authors are jointly preparing a new edition with annotated translation of the whole of Paippalādasaṃhitā, kāṇḍa 4. Another study of an individual hymn from the same kāṇḍa has appeared as Griffiths, Arlo and Lubotsky, Alexander, "Paippalādasaṃhitā 4.15. To heal an open fracture: with a plant", *Die Sprache*, XLII/1-2 (2000-01 [appeared 2003]): pp. 196-210. The *editio princeps*, our basic point of reference, is that of Bhattacharya, Dipak, *The Paippalādasaṃhitā of the Atharvaveda*: I. *Consisting of the first fifteen Kāṇḍas*. II. [...] sixteenth Kāṇḍa. III. [...] seventeenth and eighteenth Kāṇḍas (Calcutta: The Asiatic Society, 1997, 2008, 2011). For information on our editorial method, on manuscripts, and for the editions of other Vedic texts that we cite, see Griffiths, Arlo, "Paippalāda Mantras in the Kauśikasūtra", in Griffiths, A. and Houben, J.E.M. (eds.), *The Vedas: Texts, Language and Ritual* (Groningen: Egbert Forsten, 2004): pp. 49-99.

of criticism, it may be observed that the hymn exceeds by one the standard of seven stanzas per hymn, which is current in kāṇḍa 4; the obvious candidate for excision would seem to be stanza 8, in a different meter, but it fits the context too well to be treated as secondary addition. Such departures from norms are in any case an undeniable feature of the composition of the Paippalādasaṃhitā.

We will pay attention to previously unattested finite verb forms (satām, śayāsai), a noun that is a hapax legomenon (puvas- "pus"), and a mythological figure who is only very rarely attested elsewhere, Puruṣanti. The key-word of this hymn, however, is śalyá-, and its interpretation takes us to the domain of realia. The most recent discussion of this word seems to be the one offered by Schlerath in his 1997 reaction to earlier publications of Tapan Kumar Das Gupta, Harry Falk and especially Wilhelm Rau.² We agree with Schlerath that śalyá- does not denote the barbs of an arrow-head, but Schlerath gives no positive solution. The present hymn provides valuable new evidence on the terminology of arrow components in general, and the meaning of śalyá- in particular. Indeed, as Rau stated with characteristic conciseness, «das dunkle Lied AV(P) 4,14 ... bedarf gesonderter Behandlung».³

³ Rau, Wilhelm, *Metalle und Metallgeräte im vedischen Indien* (Wiesbaden: Steiner, 1973 [= Akademie der Wissenschaften und der Literatur, Abhandlungen der Geistes- und Sozialwissenschaftlichen Klasse, Jahrgang 1973, Nr. 8, Mainz]): p. 40, n. 52.

ta ātmeta *it] ta ātmeta ita [Ma Ja Vā], tu ātmeta ita Ku, tātumayatahitu K prahitaḥ] [Ma Ja Vā], prehitaḥ Ku, prahita K

Bhattacharya reads $\bar{a}\dot{s}\bar{t}\dot{h}$ and *ita prahita\dot{h}*. He does not indicate that $\dot{s}_{r}nvann$ constitutes at least a slight emendation.

b. This is likely to be the oldest attestation of *vestana*-. The broad range of meanings of this neuter noun in classical Sanskrit (see PW, pw) can be reduced to a basic meaning "covering, wrapping". We find it in Vedic only once outside of the PS, namely in ŚāńkhGS 3.1.6-11, where it is likely to be a synonym of *usnīsa*- and hence to have the specific meaning "turban": yuvam vastrāni iti vāsasī paridhāya | atha asmai niskam badhnāti āyusyam varcasyam | mamāgne varca iti vestanam | gṛhamgṛham ahaneti chattram | ā rohatety upānahau | dīrghas te astv ankuśa iti vaiņavam⁴ dandam ādatte | «Having dressed him with two garments with (the verse), 'The garments both of you' (RV 1.152.1), he then puts on him a golden ornament (with the words), 'Giving life and vigor' (RVKh 4.6). With (the verse), 'Mine, Agni, be vigor' (RV 10.128.1), he takes a vestana; with (the verse), 'House by house the shining one' (RV 1.123.4) the parasol; with (the verse), 'Rise up' (RV 10.18.6) the sandals; with 'Long be thy hook' (RV 8.17.10) a bamboo staff». This list is taken up in the concluding instruction of the chapter in question, ŚānkhGS 3.1.18: ācāryāya vastrayugam dadyād usnīsam manikundalam dandopānaham chattram ca «To his teacher he shall give (that) pair of garments, the turban, jewel and ear-rings, staff and sandals, and the parasol» (we have basically followed the translations of Oldenberg,⁵ although with some modifications). The text has a very close parallel in KausGS (also chapter 3.1), but the parallel does not throw light on the meaning of *vestana*-, which is absent there, a fact that could suggest it may be an interpolation in the Śankhayana text. For a similar list of items, including the uṣṇ̄ṣa-, see Knobl: 35-55 on PS 7.15.6-8.6 It is perhaps just a coincidence that the ŚānkhGS list includes vestana- as well as vainava- danda-, while the present PS stanza has venur vestanam. In the PS, vestana- seems to be a technical term for a part of the arrow, possibly some kind of wrapping that binds the feather flight onto the shaft. Cf. also

⁴ We follow Oldenberg's edition. Sehgal's edition shows here the obviously inferior reading *vaiṣṇavaṃ*.

⁵ Oldenberg, Hermann, The *Gri*hya-Sûtras. Rules of Vedic Domestic Ceremonies, Part I. *S*âṅkhyâyana-G*ri*hya-Sûtra, Â*s*valâyana-G*ri*hya-Sûtra, Pâraskara-G*ri*hya-Sûtra, Khâdira-G*ri*hya-Sûtras, *Sacred Books of the East*, XXIX, XXX (Oxford: Clarendon, 1886).

⁶ Knobl, Werner, "Zwei Studien zum Wortschatz der Paippalāda-saṃhitā", in Griffiths, Arlo and Schmiedchen, Annette (eds.), *The Atharvaveda and its Paippalādaśākhā: historical and philological papers on a Vedic tradition* (Aachen: Shaker, 2007): pp. 35-70.

11.2.12 alasya vyañjanasya veṣṭanasyota parṇadheḥ | granther ⁺jyāyā iṣvā viśaraṃ nāśayāmi te «I remove for you the piercing power of the poison, of the ornament / anointing (?), of the wrapping, of the feather-socket, of the knot, of the bow-string, of the arrow».

Regarding the meaning of śalyá-, it is useful in our opinion to look beyond the sole Vedic data that were taken into account by Rau and Schlerath, and to abandon the rather rigid and literalistic one-to-one determinism – whose basic assumption is that a difference in words must correspond to a difference in objects denoted – that characterizes some of the work in Vedic realia. In his anthology of Sanskrit medical writings, Wujastyk has chosen to translate śalya- with "splinter". He has justified his choice in terms that are equally relevant for the interpretation of the Vedic passages:⁷

The word 'splinter' translates Sanskrit śalya. In some contexts this equivalence is adequate, but the semantic fields of the two words are not identical, and there are places where using 'splinter' creates an odd effect. A śalya is often a literal splinter of wood, bone, or metal. Its metaphorical use — sorrow as a 'splinter' in the heart ... — still works in English. But in many places a śalya is clearly an arrow, and in others a fragment of food, etc. No single English term quite covers this range. Terms like 'spike', 'dart', 'shrapnel', or just 'foreign body' all work in places, but I have stayed with 'splinter' as the nearest generic term, for better or worse.

Keeping these problems in translating Āyurvedic śalya- in mind, we may observe that the word almost always occurs in explicit connection with arrows in the Atharvaveda, and even where it does not, can mostly be interpreted as "arrow-tip". Cf. e.g. PS 1.46.2d bahiḥ śalyaś caratu rogo asmāt «let the tip, the ailment go outside of him», 14.4.5ab vijyaṃ dhanuḥ śikhaṇḍino viśalyo bāṇavāṃ uta «the crested one's bow is stringless and his arrow tipless», etc. A meaning such as "splinter", or in any case a "foreign body" less directly associated with arrows, might be preferable at PS 15.20.10 brahmaṇeto nāśayāmo yat kiñ cāṅgeṣv āmayat | *śalyān* yakṣmasyātho ropīs tā ito vi nayāmasi «Whatever hurts in the limbs do we make disappear from here with a formula. We remove from here the splinters and the pains of the yákṣma-disease». In any case, adducing a collocation such as ŚS 6.57.1cd / PS 19.10.4cd iṣum ékatejanāṃ śatáśalyām against the idea that śalyá- can mean "arrow-tip", as does Rau (1973: 40 n.

⁷ Wujastyk, Dominik, *The Roots of Āyurveda. Selections from Sanskrit Medical Writings* (London: Penguin Books, 1998): p. 112.

⁸ Ed. śalyām.

52), seems to us to reveal a naively literalistic reading of the numerical hyperbole that is typical of Vedic mantras. See further under 5d below.

c. The interpretation of this pada is very uncertain. Firstly, there is the problem of reading: the reading *jana ehi* that is found in the Or. mss. cannot be ruled out with certainty. The expression in 4c iyam te mātemam ehi bandhum seems comparable at first sight, but unfortunately it appears very difficult to presume that jana here represents an acc. sg. form of jánas- n. attested at RV 2.2.4, which would have given an elegant syntactic parallelism («being a son who listens to his mother, go to your folk»): this consonant stem no longer exists in the language of the Atharvaveda, and no imaginable reason would have prevented the poet from saving *ianam* ehi. Rather, jana would have to be read as loc. sg. form of jana-, which can denote "people" collectively, while (as pointed out by Zehnder)⁹ its loc. form jane can function as adv. "abroad, far away". But with \bar{a} ihi "come" and *śrnvan* "listening" – presuming with hesitation that this reading is correct –, it is then hard to construe a sentence. In view of the likely corporeal sense of atman- in the next pada, we tentatively choose here to follow Bhattacharva's adoption of the K reading *janayehi*, with imperative form *janava*. An imaginable adv. **janavá* (cf. Scarlata)¹⁰ is unattested in the RV, and therefore highly unlikely to be intended here. ihi would be from av in its auxiliary function (cf. Delbruck), 11 joined to the present participle synvan. The pada then may be seen to invert the proverbial association of mother and son, that we see at PS 17.52.2 janitrīva prati hṛṇyāsi ⁺sūnuṃ saṃ tvā dadhāmi pṛthivīṃ ⁺pṛthivyā | ukhāḥ kumbhīr vedvām samcarantām vajñāvudhair ājvenābhisiktāh. 12 «You shall welcome $(?)^{13}$ as a mother a son; I unite you that are earth with the earth; pots, vessels must come together on the sacred ground, being anointed with ghee by means of the utensils of worship» (~ SS 12.3.23, but the PS reading overall makes more sense). All in all the meaning remains very obscure, and one may wonder whether some ancient corruption lies behind the relatively uniform text transmitted by the manuscripts. It may be worth considering, for instance, to conjecture *śrngam instead of *śrnvann (see st. 5 below). It must be pointed out that there is explicit manuscript support

⁹ Zehnder, Thomas, *Atharvaveda-Paippalāda*, *Buch 2. Text, Übersetzung, Kommentar* (Idstein: Schulz-Kirchner, 1999): pp. 151f. on 2.66.3.

¹⁰ Scarlata, Salvatore, *Die Wurzelkomposita im Rg-Veda* (Wiesbaden: Reichert, 1999): p. 421.

¹¹ Delbrück, Berthold, *Altindische Syntax* (Halle an der Saale: Niemeyer, 1888 [=Syntaktische Forschungen, 5]): p. 390.

¹² Ed. santvā; pṛthivīṃ pṛthivyām; sañcarantāṃ; ājyenātiṣaktāḥ.

¹³ We translate as though PS *prati hṛṇyāsi* – the reading seems relatively secure – means the same as *práti haryāsi* in ŚS.

in **K** for a word ending in -am, but it must also be recalled that the spelling -mn for -nn is a common feature of the Or. mss. (e.g. 4.13.5b: pradahamn ihi for pradahann ihi; 4.32.5a: samn apa for sann apa; 4.32.6c: vajrimn upa for vajrinn upa), so practically there is nearly equal support for Bhattacharya's reading, that we retain for lack of a better alternative.

d. Bhattacharya's *ita prahitaḥ* is unacceptable and, since the transmitted cross-caesura sandhi can hardly be original, also unmetrical. *ita* 2pl. impv. cannot be construed with *prahitaḥ*. Therefore we emend to **it* (cf. 4c just below). The same mistake is attested at PS 2.8.5c ād **it stenam ahiṃ* «and then the thief, the snake» instead of *ita* of the mss. (cf. Zehnder 1999: 42). The general tendency notable in the mss. to resolve complex consonant cluster by vowel epenthesis – or, if one prefers a graphic explanation, to forget *virāma* signs – may here have been compounded by perseveration from 15.11.3cd [†]*māsmām arann amuta āpatantīr itaḥ prahitāḥ savitar jayantu* «May [the arrows], flying from there, not hit us. Being sent forth from here, let them be victorious, O Savitar».

The cadence remains defective (short tenth syll.).

On the concrete meaning of $\bar{a}tman$ - that we assume to be intended here. ¹⁴

asthi bhittvā yadi [†] majjñaḥ [†] papātha	(11)
yadi vāsi rataḥ puruṣantikāme	(12^{T})
urvīm gavyūtim abh _i y eh _i y arvān	(11)
paścā raśmīn ⁺ udyataḥ sūr _i yasya	(11)

If you, having split the bone, have drunk marrow, or if you are pleased with the wish of Puruṣanti, come here to the broad pasture, West of the rays of the rising sun.

Bhattacharya edits prapātha.

¹⁴ Griffiths, Arlo, *The Paippalādasaṃhitā of the Atharvaveda. Kāṇḍas 6 and 7. A New Edition with Translation and Commentary* (Groningen: Egbert Forsten, 2009): p. 152.

a. Note that the Or. mss. read *bhitvā* and *majñaḥ*: these degeminations are common, and the latter one occurs also in the same word in PS 4.15.¹⁵ The reading *prapātha*, adopted by Bhattacharya, yields no sense. One might be tempted to understand the pf. form here as indicating "having drunk enough", i.e. being satiated, but Kümmel¹⁶ does not mention any cases where the pf. of this root is used with such a connotation.

bc. On the polysemy inherent in forms of *ram*, see Renou, ¹⁷ As will become clear below, we believe that the sense "to be pleased with", i.e. "to accede to", is probably intended here. For the name Puruṣanti, cf. RV 1.112.23cd *yābhir dhvasántim puruṣantim ávataṃ tābhir ū ṣú ūtíbhir aśvinā gatam* «come here, O Aśvins, with those helpers, with whom you helped Dhvasanti and Puruṣanti», 9.58.3ab *dhvasráyoḥ puruṣantyor á sahásrāṇi dadmahe* «we take thousands from Dhvasrā and Puruṣanti», Geldner's comments *ad loc.* and Macdonell & Keith 1912 *s.v.* What is meant by the wish of Puruṣanti is not elucidated by these two passages. If we turn to later Vedic sources to find a clue, we fortunately find one in the Sāmavedic myth recounted briefly at PB 13.7.12 and somewhat more elaborately at JB 3.139. Both passages are cited below.

13.7.12 dhvasre vai purusantī *tarantapurumīdhābhyām* vaidadaśvibhyām sahasrāny aditsatām tāv aiksetām katham nāv idam āttam apratigrhītam syād iti tau pratyaitām dhvasrayoh purusantyor ā sahasrāni dadmahe tarat sa mandī dhāvatīti tato vai tat tayor āttam apratigrhītam abhavat | āttam asvāpratigrhītam bhavati va evam veda | 18 «Dhvasrā and Purusanti wished to give a thousand (cows) to Taranta and Purumīdha, the son[s] of Vidadaśva. These (latter mentioned) two thought: 'How may this (gift) be taken (and) not received, by us?' They accepted (it) with (the words, occurring in the tetrastich) [SVK 2.409 = RV 9.58.3]. Thereupon this (gift) was taken, not received by them». We have cited the translation of Caland, who explains in a note that «The stress must be laid on \bar{a} dadmahe 'we take' which is not the same as pratigrhnīmah».

JB 3.139 atha ha vai tarantapurumīḍhau vaidadaśvī¹⁹ dhvasrayoḥ puruṣantyor bahu pratigṛhya garagirāv iva menāte | tau ha smāṅgulyā

¹⁵ Griffiths and Lubotsky, "Paippalādasaṃhitā 4.15".

¹⁸ Variant readings: *vaidadaśvibhyām* thus Calcutta ed. [C], *vaitadaśvibhyām* Benares ed. [B]. – *aditsatām*] B, *adichatām* C. – *pratyaitām*] C, *pratyetām* B. – *dadmahe*] C, *daprahe* B.

¹⁹ *vaidadaśvī*] em. (Oertel), *vaitadaśvī* Ed.

sātam pratimamṛśāte | tāv akāmayetām asātam nāv idam sātam syād āttam ivaiva na pratigrhītam iti | tāv etac caturrcam apaśyatām, tena pratyaitām | tato vai tayor asātam sātam abhavad āttam ivaiva na pratigrhītam | sa vah pratigrhva kāmavetāsātam ma idam sātam svād āttam ivaiva na pratigrhītam iti sa haitena caturrcena pratīyāt | asātam haivāsya sātam bhavaty āttam evaiva na pratigrhītam | «Now indeed Taranta and Purumīdha, two descendants of Vidadaśva, having received much of the two, Dhvasra and Purusanti, considered themselves like two persons having swallowed poison. Well, they touched what they had got with the finger. They wished: 'Would that we had not got what we have got here, that we had not received, what we have taken as it were.' They saw this rcquatrain. With it they returned. Thence indeed what they had got became not got, what they had taken as it were [became] not received. If anyone having received (something) should wish: 'Would that I had not got what I have got here, that I had not received what I have taken as it were', he should return with this rc-quatrain. Then, indeed, what he has got becomes not got, what he has taken as it were [becomes] not received» (after transl. Oertel, 20 with modification only of his interpretation of *dhvasrayoh purusantyor*).

These passages are clearly significant for the interpretation of our stanza which, like the quatrain used by Taranta and Purumīḍha, must have been intended to get rid of an unwanted "gift". The PB passage explicitly makes a connection with cattle (cf. our gavyūti-), and the JB explicitly relates the unwanted gift with poison. If the addressee, i.e. the arrow-tip, here wishes to accede to Puruṣanti's desire, it shall accept the gift of cattle and go out to wide pasture. And by using this mantra, the one struck by the (poisoned?) arrow-tip will be rid of the cause of his ailment. It seems possibly relevant for the estimation of the age of the present hymn that it is familiar with a piece of mythology attested clearly only in two Brāhmaṇa texts, while the two places where Puruṣanti occurs in the RV seem to lack the essential element of her (his?) wish to give an undesirable gift.

d. We accept Bhattacharya's emendation ${}^{+}udyatah$, for whose attribution to the archetype the **K** reading seems sufficient guarantee, and accept also his adoption of the **K** reading $s\bar{u}ryasya$. We presume that «West of the rays of the rising sun» means fully exposed to the sun, rising in the East, or else we might interpret «after the rays», i.e., following the sun's example of leaving the confined darkness of the night/underworld.

4.14.3 Only PS

²⁰ Oldenberg, Hermann, "Das Çânkhâyagrihyam", *Indische Studien*, XV (1878): p. 40.

Mātariśvan, blowing, looking for you – the blazing sun himself has made [you] visible. Emerge from the blood, from the smell, from the pus; get released from your womb here.

mātariśvā pavamānas] **Or**, mātariśvānpavamānās **K** [†]tvāyan] tvāyam **Or K** sūrya ābhrājan] sūrya ābhrājam **Or**, sūryābhrājan **K** (')kaḥ] kaḥ **Or K** [[Bar. mistakenly: kāḥ]] [**Ma Ja Vā**] **K** [[there is a stroke above the |]], |{|} **Ku** asno] **K**, aślo **Or** puvasaḥ] **Or**, puṃsaḥ **K** pra cyavasva] **Or**, pratyavasva **K** mucyasva] [**Ja Vā**] **K**, mucyasya **Ku Ma** yonyā yā te atra] **Or**, yonyayāstetra **K**

Bhattacharya edits tvāyam and puvasah.

a. Bhattacharya's *ayam* is not impossible, but in none of the 26 other occurrences of the name Mātariśvan in the text is it joined with a proximal deictic pronoun such as *ayam*. Considering that confusion of nasals in final position is common in the mss. of this text (see e.g. unacceptable *paśyām* for *paśyān* in 7b below), we propose the restoration *tvāyan*, nom. sg. of *tvāyant-* "looking for you, longing for you" (in the RV, almost always scanned $t_{\nu}v\bar{a}y\dot{a}nt$ -), the interpretation suggested by Zehnder.²¹

It seems certain that *pavamāna*- is intended as double entendre, meaning "blowing" besides "purifying", for while Mātariśvan is in the Atharvaveda sometimes presented in close association with the sun (e.g. PS 10.7.4, 13.1.7), as he is here, he is most often clearly associated with the wind. Cf. e.g. ŚS 10.9.26 (~ PS 16.138.7) *ulūkhale mūsale yás ca cármaṇi yó vā śūrpe taṇḍuláḥ káṇaḥ* | yáṃ vā vấto mātariśvā pávamāno mamāthāgniṣ tád dhótā sūhutaṃ kṛṇotu «What in the mortar, on the pestle, and on the hide, or what rice-grain, [what] kernel in the winnowing-basket, or what the wind, Mātariśvan, blowing, shook – let Agni as hótar make that well-offered» (Whitney), and further PS 5.16.1, 7.20.9, 15.2.4, 16.1.5, 16.22.5, 17.5.9. In the tṛca PS 19.50.1-3 (for removal of a śalyá-), the pāda 2a *pra tvā vātaś cyāvayatu* makes the connection with the wind explicit.

c. Bhattacharya proposes an emendation * $p\bar{\imath}vasah$ in his critical apparatus, but it seems unnecessary to us. Although the word puvas- is not attested elsewhere in Vedic or later Sanskrit, it is a perfect match of Gr. π óoç n., Lat. $p\bar{u}s$, $p\bar{u}ris$ "pus" \leftarrow PIE *puH-os-. The normal Sanskrit word for 'pus' is $p\hat{u}ya$ - m.n., attested from the Brāhmaṇas onwards, but it is a transparent derivative from the present $p\hat{u}yati$ 'to become putrid'.

Bhattacharya edits adhy.

a. We can safely emend *abhy*. The **K** reading *saty* shows the confusion of *ty* and *bhy* that is typical for Śāradā script (cf. also 7c *atyaktaḥ* for *abhyaktaḥ*). Neither *adhi-ā-ay*, nor *ati-ā-ay* are attested; *adhi-ay* means "to observe, understand, mind", which does not suit the context. Most importantly, cf. *abhy ehy arvān* at 2c. For other cases of replacement of *abhi* by *adhi*, we refer to our discussion under 4.16.1 in our forthcoming comprehensive publication on PS 4.

Bhattacharya edits prahitavas p

bc. We accept Bhattacharya's emendation $prahit\bar{a}vasrst\bar{a}$, as the vacillation of s and s is very frequent in all mss. for the PS.

However, the form $vidv\bar{a}n$ accepted by Bhattacharya is impossible for several reasons. First of all, the masculine participle does not concord with the feminine gender of the subject (devi!). Secondly, the sandhi -n \acute{s} -would be unique for the Or. mss. (cf. Griffiths, 22 which supersedes the comments on 5.6.5b in Lubotsky). Griffiths 24 proposed to read $^{\dagger}prahit\bar{a}vasrsitaviddh\bar{a}$ $\acute{s}rngam$ puruse $jah\bar{a}tha$ (with differently placed punctuation, following K). We now propose an alternative solution to the textual problem, namely to emend $*viddhv\bar{a}$ (although we remain hesitant because it seems that a form with preverb \acute{a} is desirable, in light of the evidence cited below).

We find the same kinds of errors in the mantra PS 19.33.3, found quoted at KauśS 128.4, where Griffiths²⁵ proposed to edit: *utāviddhāṃ niṣkhidatātho śrathnīthāyatām* | *mā no viśve devā maruto hetim asthata* «Both regurgitate the penetrated [arrow], and slacken the strung [bowstring]: do not throw the missile of the Maruts at us, O All Gods». The readings in the case of this last mantra are: KauśS *utāvidvān*; **Or** *°vidvā/vidvān*; **K** *°riddhāṃ*. The nasal that we see in the readings of the mss. for the present mantra (**Or** *vidvān/vidvāna*; **K** *vadvān*) may be attributed to anticipation of this mantra in PS 19. A last passage worth quoting here, also from PS 19, has a parallel at ŚS 6.109.1: *pippalī kṣiptabheṣajy ùtātividdhabheṣajī* | *tāṃ devāḥ sám akalpayann iyáṃ*

²² Griffiths, *The Paippalādasaṃhitā of the Atharvaveda*: p. LIX.

²⁵ Griffiths, "Paippalāda Mantras": pp. 91f.

jīvitavā álam «The berry, remedy for what is bruised, and remedy for what is pierced – that did the gods prepare; that is sufficient for life» (Whitney). Here the evidence of the mss. for the PS version, 19.27.9 – unanimously utātavidvabheṣajī in the Or. mss., uta ca viśvabheṣajī in K – cannot be resolved without taking recourse to conjecture: we hesitantly propose to restore *utātividdhabheṣajī, as the ŚS mss. unanimously transmit. But what is certain is that we have here another case of corrupt transmission of a form of vyadh. And from PS 11.10.1c āviddham śalyam *cākṛttur ²⁶ «They pulled out the arrow-tip that had penetrated», it is clear that the key-word śalya-, unmentioned in this stanza, may be implicit in all such passages.

d. Bhattacharya's *vānah* can simply be read as *bānah*, because the Or. mss, do not distinguish b and v, while K omits the word. The K reading śrngo shows the mistake of o for am that is frequently found in Śāradā manuscripts. The reading of the Or. mss. is a clear case of the influence of surrounding forms in -ah. The textual evidence does not allow a convincing argument that śrnga- and several other words (anīka-, mukha-, śalva-) cannot all denote the "arrow-tip". Since arrow-tips were at that time usually made of horn, this metonymic reference is only natural. It seems impossible to us to read in the Vedic passages discussed by Rau and Schlerath systematic descriptions of the composition of arrows, where every term would denote a separate part. Rather, we believe that such passages contain redundancies, something Rau²⁷ as well as Schlerath found difficult to accept: «Störend ist jedenfalls, daß bei allen diesen Deutungen Spitze (śrnga-, anīka-, mukha-) und śalya- des Pfeils einen einzeigen Teil bilden». 28 One of the synonyms for "arrow-tip" thus far unattested may have been sikhara-, unless it refers to the whole construction for fixing the horn tip.

Besides this passage, the only other attestation of the word *śikhara*- in what are normally considered the older strata of Vedic literature – i.e. the Saṃhitās and Brāhmaṇas – occurs at KauṣB 26.2.6 [ed. Lindner 26.1:120.17f.] *tad yathā giriśikharāt kartam abhi praskanded evaṃ tat stomakṛntatram* «it is as if from a mountain peak one should fall into a pit; it is a cleaving of the Stomas» (Keith). One could interpret the use in our text of this word, not likely to be part of inherited vocabulary (EWAia II, p. 634f.), as sign of lexical innovation.

The form $sat\bar{a}m$ is 3pl. impv. middle of the root-aor. of $s\bar{a}$ ($\leftarrow *sH-at\bar{a}m$), and seems to present the first attestation of this ending in the root-aorist. The ending $-at\bar{a}m$ is frequently attested in the athematic present, cf.

²⁶ Ed. *cākratur*.

Bhattacharya edits sikhāsu, dadhir na and -akṣiśalyaḥ.

- a. Bhattacharya's reading is not acceptable, because the word $\pm ikh\bar{a}$ appears with palatal initial elsewhere in the PS (6.23.4e $\pm ikh\bar{a}m$, 5.24.4a $\pm ikh\bar{a}m$ = $\pm ikh\bar{a}m$. However, the reason for the use of the plural here is as unclear to us as the reason why 'hair-locks' would be mentioned here.
- c. Bhattacharya's *dadhir* is meaningless and does not account for the available ms. readings. The emendation to *dadhṛn was already hinted at by Barret (who proposed dadhṛk pāśān). The adverb dadhṛk was still part of the active vocabulary of the PS poets, as appears from its occurrence in another PS mantra not attested in any other Saṃhitā: 4.27.3cd gobhājam *aṃśaṃ tava ye samānāḥ sarve samagrā dadhṛg ābharanta «Those who are your equals, all, alike, dadhṛk have brought a share consisting of cows». This hemistich, where dadhṛk stands after the sequence samānāḥ sarve samagrāḥ, is important for determining the meaning of this rare Vedic word. Usually (and, we think, correctly) dadhṛk is taken as an adverb (n. sg.), derived from the adj. *dadhṛṣō-, which is reflected in RV dadhṛṣō-, dadhṛṣváni- "bold". Common translations are: "herzhaft, fest, tüchtig,

fortiter" (pw), "fest, zuversichtlich, herzhaft" (EWAia), "strongly, boldly" (MW), etc. An important indication in support of this analysis follows from the parallel use of dadhýk and dhṛṣát in RV 8.82.2 tīvrấḥ sómāsa ấ gahi sutắso mādayiṣṇávaḥ | píbā dadhýg yáthociṣé (to Indra) «Strong are the Soma-juices, come here. Intoxicating are the ones that are pressed out. Drink [them] boldly (= without hesitation), as you are used to» and 6.47.6a dhṛṣát piba kaláśe sómam indra «Drink boldly the Soma in the jar, O Indra».

However, it seems to us that in these contexts, <code>dadhŕk</code> may have been felt to mean not "boldly, without hesitation", but rather "in one draught, at once, totally". Parting from this assumption, we can interpret the difficult passage RV 10.16.7 (~ ŚS 18.2.58 / PS 18.68.8): <code>agnér várma pári góbhir vyayasva sám prórnuṣva pívasā médasā ca | nét tvā dhṛṣṇúr hárasā járhṛṣāṇo dadhṛʻg vidhakṣyán paryankháyāte «(to the body of a deceased person:)</code> Wrap around you a protection of the milk(-products) against the fire, cover yourself with fat and grease, lest the bold one, being excited, fasten himself around you with his glow, about to totally consume you». Here the meaning "totally" would arguably provide a better sense than "boldly", since the idea of 'wrapping' the corpse is to preserve it ritually from total annihilation.

The next problem we have to face is whether to read *nah* (for which there is only weak ms. support) or na, and if the latter, whether to interpret it in negative or comparative sense. The frequency of comparative $n\acute{a}$ is on the decline in the language of the AV, but is not unknown,²⁹ so the choice must be determined by an understanding of what the mantra intended to convey, which is precisely the problem here. An interpretation such as "having boldly/totally released - not (just) torn off - the bonds" might be conceivable. The fact that some cases of the combination *nah pāśa- moc* are found in the AV Samhitās (ŚS 19.44.4cd nírrte nírrtyā nah páśebhyo muñca, 9.3.24a / PS 16.41.2a má nah páśam práti mucas) is not necessarily an argument for the reading *nah*, for the appearance of the visarga in $V\bar{a}$ may precisely be due to perseveration from such passages, and the syntactic constructions are different. On the other hand, the stanza PS 2.31.3 indro hanişyatām vadham vi naḥ pāśām ivācrtat «Indra untied for us like bonds the weapon of those about to hit» might speak in favor of reading *nah* here: "having boldly/totally torn off, released for us the bonds". But we tentatively opt for *na* in comparative sense.

On the sandhi $p\bar{a}s\bar{a}n apa^{\circ}$, here treated differently in **K** on the one hand, and the **Or** mss. on the other (the exact spelling of the nasal being irretrievable for Bhattacharya's mss.; our **Ku** suggests all have the

²⁹ Whitney, William Dwight, "Index Verborum to the Published Text of the Atharva-Veda", *JAOS*, XII (1881): pp. 1-383 [Reprint: Vaduz, Liechtenstein: Topos Verlag, 1982]: p. 160.

orthography with -n, as we assume in our apparatus).³⁰ apa-varh is not attested, so we read apavrjya after **K** (confusion of hy and jy is rampant in the Or. mss., see Zehnder).³¹ Cf. especially ŚS 10.7.42cd prấnyấ tántūṃs tiráte dhatté anyấ nấpa vṛñjāte ná gamāto ántam «The one draws forth the threads, the other sets [them]; they wrest not off, they do not go to an end» (Whitney).

d. Presumably, *akṣi* refers to an abnormal passageway in the flesh, called 'fistula' in Western medical jargon. When the arrow-tip has become lodged in the body (see stanzas 2 and 3) but the patient survives the ensuing infection, the wound forms a pipe-like drainage for the pus. Eventually, the foreign element (the arrow-tip) will become encapsulated and can then be easily removed, and stanza 8 refers to this. The words *akṣi* and *śalyaḥ* clearly do not form a compound.

kośe jāmīnām nihito ahimsah	(11)

You will become united, being carried from hand to hand. Due to the power of the plants, they will see you outside. Washed by the waters, you will lie, anointed, placed in the box of the female relatives, not harmful.

hastād dhastam] **Or**, hastābhyastam **K** sam ayo] **Or**, śamayo **K** bhriyamāṇo] **Ku** [**Ja Ma**], bhrīyamāṇo **Vā K** bahiṣ ṭvā] [**Ja Ma**], bahi{śa}ṣvā **Ku**, bahiṣṭā→ṣṭvāṃ **Vā**, vahiṣṭā **K** †paśyān] paśyām **Or**, pacyām **K** adbhiḥ praṇiktaḥ] [**Vā Ja**], adbhipraṇiktaḥ **Ku Ma**, adbhiḥprāṇakta **K** śayāsā abhyaktaḥ] **Ku** [**Ma Vā**], śayāsābhyaktaḥ **Ja**, syāssatyaktaḥ **K** [[note °ḥ k°]] jāmīnāṃ nihito] **Or**, jamīnāṃ nihataṃ **K** ahiṃsaḥ ||] [**Ma Ja Vā**], a{rvi}hiṃsaḥ **Ku**, hyaṃsaḥ [[om. |]] **K** [[note °ḥ ṣ°, Bar. misprints °saḥ.]]

Bhattacharya edits paśyām.

a. On the construction X-abl. + X-acc. 'from X to X', cf. 15.23.5ab *vartrād *vartram ā krāma parvatād adhi parvatam "step from dam to dam, from mountain to mountain".

 $^{^{30}}$ Griffiths, The Paippalādasaṃhitā of the Atharvaveda. Kāṇḍas 6 and 7: pp. LVI-LVIII.

³¹ Zehnder, *Atharvaveda-Paippalāda*.

- b. The expression *vīrudhāṃ balena* is also attested at PS 5.10.8a. *paśyāṃ* is an impossible form, and can easily be emended to 3pl. subj. See our remark on confusion of final nasals under 3a.
- c. śayāsai is 2sg. subj. with double characterization. The form is a hapax. Cf. ŚS 10.1.25 abhy àktāktā svàraṃkṛtā sárvaṃ bhárantī duritáṃ párehi «Anointed, smeared, well-adorned, bearing all difficulty, go thou away» (Whitney). On another level of interpretation, the anointing could here refer to the poisoning of the arrow-head, once it has been removed, to be re-used against other enemies.
- d. Cf. ŚS 1.14.4cd (= PS 1.15.4cd) antaḥkośám iva jāmáyó 'pi nahyāmi te bhágam «I shut up thy portion (vulva?), as sisters do what is within a box» (Whitney). Another interpretation needs to be made as well: the "female relatives" stand for "arrows", and so their kośa- is the quiver. Note the metaphoric use of kinship terminology also in stanzas 1 and 4.

4.14.8 Only PS

şaştırātre şaştıkasya	(8)
śalyasya paridhis krtah	(8)
itas tam adya te vayam	(8)
[†] āsthānāc cyāvayāmasi 14	(8)

In a period of sixty days, for the arrow-tip, which [develops] in sixty days, an enclosure has been prepared. We today remove it (the arrow-tip) for you from here, from its place.

```

BIOGRAPHICAL NOTES

Arlo Griffiths held the chair of Sanskrit at Leiden University from 2005 through 2008, before joining the École française d'Extrême-Orient as Professor of Southeast Asian History. His main fields of academic interest are ancient Southeast Asian history on the basis of inscriptions, and Sanskrit philology at large. He is the author of *The Paippalādasaṃhitā of the Atharvaveda. Kāṇḍas 6 and 7. A New Edition with Translation and Commentary* (Forsten, 2009), several articles on Atharvavedic philology, and several more on Sanskrit as well as vernacular epigraphy of Southeast Asia.

Alexander Lubotsky is Professor of Comparative Indo-European Linguistics at Leiden University. His publications include *The system of nominal accentuation in Sanskrit and Proto-Indo-European* (Brill, 1988), *A Rgvedic Word Concordance*, 2 vols. (American Oriental Society, 1997), and *Atharvaveda-Paippalāda*, *kānda five. Text, translation, commentary* (Harvard Oriental Series: Opera Minora, 4, 2002).
